PROJECTS

1. Calculator Application

Technology Used: VB.NET

Developed a basic Calculator Application using VB.NET as part of my minor project. The application performs essential arithmetic operations such as addition, subtraction, multiplication, and division.

2. Hospital Management System

Technology Used: SQL

Collaborated with a team to develop a Hospital Management System as part of our minor project. The system was designed to streamline hospital operations, including patient management, appointment scheduling, billing, and inventory management.

3. Walking Man with Seasonal Changes

Technology Used: c++

Developed a Walking Man Animation with Seasonal Changes as part of my minor project. The project showcases a walking man whose environment changes with each step, representing the transition between different seasons. As the man walks, the background dynamically shifts to reflect the change in seasons, such as from spring to summer, fall, and winter.

4. Food order website (front-end)

Developed a responsive, user-friendly food website using HTML and CSS to showcase a variety of dishes in an interactive and visually appealing layout.

5. To-do list

Developed a dynamic and interactive To-Do List application using HTML, CSS, and JavaScript. The application allows users to add, remove, and mark tasks as completed, providing an intuitive and responsive user interface.

SKILLS

- Task Prioritization
- Teamwork
- Problem Solving
- Collaboration
- Organization and Time Management
- Front end developer
- Communication
- DBMS using sql
- Knowledge of programming languages, (c,c++,java,html.css,javascript)

ACHIVEMENTS

- Youth fest winner in gidha
- It fest winner in debugging
- Ncc : best firing award
- School head
